[ADV 371 - Advertising Copy and Design \(COM\)](#)

ADV 371 - Advertising Copy and Design (COM) ★

Credits: 3

Discussion of principles and techniques for developing creative campaigns. Laboratory assignments apply thinking, design, and writing skills to creative problems for different media and different targets. Encompasses creative development for all advertising media.

Prerequisites: [MCOM 220](#) or [MCOM 370](#).
Corequisites: [ADV 371L](#).

[Check Course Availability](#)

[ECE 322 - Contemporary Curriculum Perspectives](#)

[CMST 470 - Intercultural Communication \(COM\)](#)

The system will default to returning results in Ranked order. If you wish you may alter the ways search results will be displayed.

Ranked results will appear with the closest matches first. Alphabetical sorting will display the courses in alphabetical order, with no regard to where the keyword appears in the results.

In this example we searched for the keyword creative. A course with "creative" in the title appears before a course with "creative" in the description.

COURSE FILTER AND DESCRIPTIONS

The screenshot shows the 'Course Descriptions & Schedules' page on the SDSU website. At the top, there is a navigation bar with links for ADMISSIONS, ACADEMICS, STUDENT LIFE, RESEARCH, ABOUT US, APPLY, and VISIT CAMPUS. Below this is a dropdown menu for the '2022-2023 Undergraduate Catalog'. The main heading is 'Course Descriptions & Schedules', followed by a sub-heading 'A Guide to Understanding Course Description Information'. A yellow callout box points to an 'Add to My Personal Catalog' button. Below this, there are links for 'Course Descriptions', 'Course Numbering', 'Course Types/Instructional Methods', 'Other Important Definitions', and 'x9x Common Course Descriptions'. A 'Search for Class Sections' section includes a 'Browse Classes' link and contact information for the Registrar's Office. A 'Course Filter' section allows users to search by prefix, code or number, type, and keyword or phrase. A yellow callout box points to this filter section. Below the filter, there are links for 'ABE (Agricultural and Biosystems Engineering)', 'ABE 101 - Introduction to Agricultural and Biosystems Engineering', and 'ABE 132 - Engineering Tools for Agricultural and Biological Engineers'. A yellow callout box points to the 'ABE 132' link. Below this, the course description for 'ABE 132' is shown, including its credits and a brief description. A yellow callout box points to the course title. Below the description, there is a 'Check Course Availability' link. At the bottom, there is a link for 'ABE 222 - Project Development for Agricultural and Biological Engineers'. On the right side of the page, there is a 'Catalog Search' section with a search bar and a 'Search Catalog' button. Below this is a 'Catalog Home' link and a list of navigation links including 'About SDSU', 'Academic Calendar', 'Admission Policies & Procedures', 'Policies & General Academic Information', 'General Education Requirements', 'Graduation Requirements', 'Student Handbook 2022-2023', 'Colleges, Departments, & their Academic Programs', 'Degrees & Associated Majors', 'Academic Programs - Majors, Minors, Certificates', 'Course Descriptions & Schedules', 'What's New for 2022-2023', 'Accelerated Bachelor's to Master's Degree Programs', 'Online, Off-Campus, Distance & Non-Credit Programs', 'Academic Advising Guide Sheets - Sample Plans of Study', 'Explore Majors & Careers', 'Professional Licensure & Certification', 'Transfer Student Information', 'Tuition, Fees, & Financial Assistance', 'Student Services & Support', 'International Affairs', 'University Organization, Administration, & Faculty', 'Faculty & Staff Directory', and 'Campus Maps'. Program Information

Geographic Information Science concerns the collection, processing, and analysis of spatial data and data acquired from satellites and airborne platforms, and from ground based measurements and surveys of human activity and the environment. Geographic Information Science students learn how to work with geospatial data to study relationships, patterns, and trends. In the U.S. the explosion of geospatial data and their increasing use in business, government, and people's everyday lives has led to a growing demand for qualified Geographic Information Science graduates. Geospatial science is developing rapidly, associated with developments in mobile, satellite and airborne remote sensing, computational, and big data technologies.

Department or School information.

Student Learning Outcomes

Graduates with a major in Geographic Information Sciences will:

- Demonstrate foundational and specialized knowledge in both the physical and human sciences and their interconnectedness at local, regional, and global scales.
- Interpret the ethical consequences of global issues concerning the environment to strengthen commitment to local, national, and global

History & Mission: The Land-Grant Heritage

A Brief History

South Dakota State University is the state's largest, most comprehensive institution of higher education. The land-grant heritage of South Dakota State University, which began with a college founded in 1881, originates from local and national legislation dating back to 1862. The Morrill Act, passed by Congress and signed by President Abraham Lincoln in July of that year, embodied a revolutionary idea in higher education. The legislation created a new type of educational institution, one to give instruction in both liberal and practical arts to people in all parts of the country who needed to work for a living. In 1889, when South Dakota achieved statehood, Congress, acting under the Morrill Act of 1862, granted 160,000 acres of land for the use and support of the "agricultural college." By accepting this land allocation, the State had to designate the Agricultural College as a land-grant college.

State Agriculture Experiment Stations were formed in 1887 under the Hatch Act of Congress, which provided for establishment of agricultural experiment stations in connection with Land-Grant universities and colleges. The stations were established to conduct research to address relevant agricultural and rural issues for their home states and regions.

The Cooperative Extension Service was established in 1914 to provide useful, current, research based agricultural, home, family, and youth related information to the people of the State. Federal funds are appropriated through the U.S. Department of Agriculture, which cooperates with state colleges of agriculture and counties in conducting planned programs of extension work.

Historically, the Land-Grant institutions have had the responsibility of training individuals to be U.S. Military officers in the event of war or military emergency, thus, alleviating the need to have a large standing army. During
